

Mould Prevention Checklist

Arrange a MouldMen Treatment.

Have an exterior house wash.

Install whirly birds on the roof to increase ventilation.

Install an exhaust fan in the bathroom.

Install a domestic household dehumidifier to further reduce moisture levels.

Have the air-conditioning unit professionally cleaned.

Cut back vegetation surrounding the property.

Use the air-conditioning unit on dry cycle to reduce moisture levels within the property.

Ventilate the property as much as possible.

Install security/fly screens.
